About Us

Kowa Optical Products Co., Ltd. is part of Kowa Company Limited, one of the largest privately own companies founded in 1894 in Japan. Kowa produces a wide variety of products in a number of industries such as healthcare, industrial, and energy conservation.

Since 1946, we have been developing, manufacturing and supplying optical equipment such as FA lens, security lens, spotting scope, binoculars and sightseeing binoculars. And have steadily developed in the optical industry as pioneering various new products ahead of the times.

We are actively developing businesses by enhancing our technology and being aware of the needs of society so as to provide more advanced products.

Function Icons

- FIXED — Fixed Focal Lens
- VARI — Varifocal Lens
- ZOOM — Manual Zoom Lens
- 21MEGA — Lens for 21 Megapixel Camera
- 12MEGA — Lens for 12 Megapixel Camera
- 10MEGA — Lens for 10 Megapixel Camera
- 8MEGA — Lens for 8 Megapixel Camera
- 6MEGA+ — Lens for 6 Megapixel Plus Camera
- 5MEGA+ — Lens for 5 Megapixel Plus Camera
- 5MEGA — Lens for 5 Megapixel Camera
- 3MEGA — Lens for 3 Megapixel Camera
- MEGA — Lens for Megapixel Camera
- 3CCD — Lens for 3CCD Camera
- C-mt — C-mount Lens
- NF-mt — NF-mount Lens
- METAL — Lens with Metal Body
- RUGGED — Ruggedized lens
- FLOAT — Floating Mechanism Design
- DIS-F — Distortion Free
- LO-DIS — Low Distortion
- XD — Extra Low Dispersion
- IR — Infrared
- WBMC — Wide-Band Multi-Coating

- 4/3 — 4/3 Inch Format Lens
- 1.1" — 1.1 Inch Format Lens
- 1" — 1 Inch Format Lens
- 2/3" — 2/3 Inch Format Lens
- 1/1.8" — 1/1.8 Inch Format Lens
- 1/2" — 1/2 Inch Format Lens
- 1/3" — 1/3 Inch Format Lens
- fmm — Focal Length (mm)

XC Series

High Resolution FA/MV Lenses

Features of XC Series

- Large image size of Φ23mm incorporated within a C-mount design.
- Megapixel resolution is maintained throughout the entire image even when the iris is fully opened.
- High precision aspherical lens greatly reduces distortion and produces a high-definition picture.
- The LM8XC generates a very wide 93.5° horizontal angle of view.
- Kowa's floating mechanism system virtually eliminates optical aberrations from close distance to infinity.

LM8XC

Magnification Using A Close Up Ring

You can use close up rings to increase the magnification and decrease the minimum object distance (M.O.D.) of the lens. Simply screw in the spacer ring between the threads of the lens mount and camera.

FC Series NEW

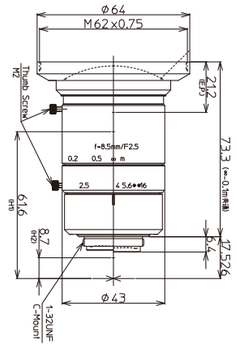
High Resolution FA/MV Lens

To Be Released in Spring 2018

Features of FC Series

- Large image size of Φ17.6mm (C-mount).
- Design optimization allows the high resolution compact lens.
- The extensive lineup of focal length.
  8.5mm, 16mm, 25mm, 35mm
  (plan: delivery from Spring 2018).
  6.5mm, 12mm
  (plan: delivery from Autumn 2018).
- Kowa's wide-band multi-coating effectively decreases glare and refraction and produces a high transmission from the visible to NIR wavelength range.

LM8FC NEW



Model	LM8FC

SC Series

High Resolution FA/MV Lenses

Features of SC Series

- Large image size of Φ16mm (C-mount).
- Able to maintain a sharp image with high resolution and contrast from the center to the corners of an image (less degradation of corner resolution).
- High precision aspherical lens greatly reduces distortion and creates a short minimum object distance.
- Kowa's wide-band multi-coating effectively decreases glare and refraction and produces a high transmission from the visible to NIR wavelength range.

1" RUGGEDIZED MEGAPIXEL

HC-V Series

High Resolution FA/MV Lenses

Kowa's new HC-V series is made for use in high vibration and shock environments.
With a design based on Kowa's standard 1" HC lenses, this new ruggedized megapixel lens series is ideal for applications that require increased durability and high optical performance.

Features of HC-V Series

- For megapixel applications requiring a sensor size of 1" (Φ16mm).
- Unique mechanical design to guard against strong vibration and shock.
- Two way reversible nut is utilized to tightly lock the focus adjustment ring in place.
- All internal glass elements are glued to the inside housing to improve stability.
- Interchangeable iris plates are used to select the F-stop.

Interchangeable Iris Plates

1 The HC-V series uses interchangeable iris plates instead of mechanical iris diaphragms with moving blades. You can choose from four iris plates to adjust the F-stop.

Interchangeable Iris Plates

Focus Adjustment Procedure

2 Unscrew the bottom ring of the outside body to adjust the focus to optimal position.

3 Screw the red two way reversible nut on the center body towards the bottom ring to lock in the focus.

Two Way Reversible Nut

JC10M Series

High Resolution FA/MV Lenses

Features of JC10M Series

- 200lp/mm center resolution and low distortion maximize performance of high-end inspection.
- Incorporating Kowa's wide-band multi-coating and floating mechanism system, the JC10M lens series greatly reduces chromatic aberration from close distance to infinity and maintains a high transmission from visible to NIR.
- Short minimum object distance and compact design using aspherical lenses (5 models/f=5~25mm) allow for easy installation in compact machine vision systems.

JC5M2 Series

Kowa's JC5M2 lens series is perfect for high-end applications that require the use of 5 megapixel camera.

Features of JC5M2 Series

- Incorporating Kowa's floating mechanism system, the JC5M2 lens series greatly reduces chromatic aberration from close distance to infinity.
- With a fast F-stop, locking screws, and a compact design, these lenses provide a good value between price versus performance.

JC3M2 Series NEW

High Resolution FA/MV Lenses

Features of XC Series

- Kowa's wide-band multi-coating effectively decreases glare and refraction and produces a high transmission from the visible to NIR wavelength range.
- Kowa's floating mechanism system virtually eliminates optical aberrations from close distance to infinity. *Except for LM8JC3M2 and LM12JC3M2
- Low distortion
- Excellent corner brightness
- Applicable on 1/1.2" as well *Except for LM8JC3M2

NCM/JCM Series

High Resolution FA/MV Lenses

Features of WIDE NCM/JCM Series

- Super wide optical design
- Large angle of view
- Expansion angle
  (Horizontal angle 82degree, Vertical angle 66degree)

† 2/3" model: LM5JCM, 1/1.8" model: LM3NCM

Low distortion

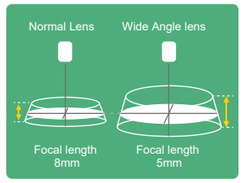
- Reduces the distortion to corner

† LM5JCM: Under 0.5%, LM3NCM: Under 0.4% (TV distortion)

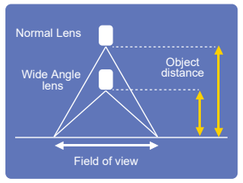
High quality

- Adapts to 2 megapixcel cameras
- Improves center and corner resolution
- High transmittance

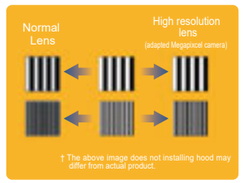
Long Depth of field



Short Close distance



Clear image



Large field of view

LM5JCM-V LM8JCM-V LM12JCM-V LM16JCM-V LM25JCM-V LM35JCM-V LM50JCM-V

JCM-V Series

High Resolution FA/MV Lenses

Kowa's new JCM-V series is made for use in high vibration and shock environments.
With a design based on Kowa's standard 2/3" JCM lenses, this new ruggedized megapixel lens series is ideal for applications that require increased durability and high optical performance.

Features of JCM-V Series

- For megapixel applications requiring a sensor size of 2/3" (Φ11mm) or smaller.
- Two way reversible nut is utilized to tightly lock the focus adjustment ring in place.
- Interchangeable iris plates are used to select the F-stop.
- Unique mechanical design to guard against strong vibration and shock.
- All internal glass elements are glued to the inside housing to improve stability.

Interchangeable Iris Plates

1 The JCM-V series uses interchangeable iris plates instead of mechanical iris diaphragms with moving blades. You can choose from four iris plates to adjust the F-stop.

Interchangeable Iris Plates

Focus Adjustment Procedure

2 Unscrew the bottom ring of the outside body to adjust the focus to optimal position.

3 Screw the red two way reversible nut on the center body towards the bottom ring to lock in the focus.

Two Way Reversible Nut

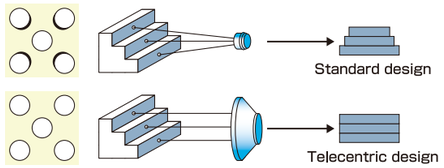
TELECENTRIC Series

High Resolution Lenses

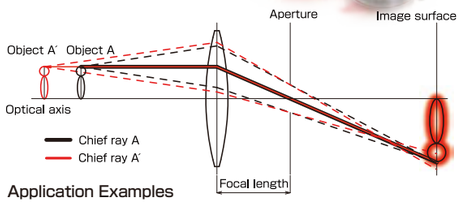
Features of TC Series

- Produces high contrast and resolution in both the center and corners.
- Virtually no TV distortion of entire image area.



Telecentric Optical System

In a telecentric optical system, there is no change in magnification when focusing. Thus, the magnification remains constant at different working distances. Similarly, the movement of an object also does not change the magnification, which makes a telecentric lens ideal for measuring objects with high accuracy.
In a telecentric optical system, the chief rays are parallel to the optical axis. As a result, the aperture becomes greater as the magnification is fixed by the focusing rays. This means that the F-number on a telecentric lens tends to be larger when compared to a standard megapixel lens.



Application Examples

- Surface inspection of silicon wafers
- Image defect inspections
- Inspection of dirt on prisms and glass circuit boards
- Measurement of thread pitches
- Reading 2D codes

4/3" MACRO ZOOM 21 MEGAPIXEL

- Telecentric lens with variable magnification
- Able to resolve up to 21 megapixels
- 0.5×~1.0× for macro use

4/3" MACRO 21 MEGAPIXEL

- 2.0x for macro use
- Able to resolve up to 21 megapixels

2/3" TELECENTRIC 5 MEGAPIXEL PLUS

- Telecentric lens with variable magnification
- Able to adjust the magnification to match with the pixel size of the camera
- Lenses are designed with an optical magnification that is ideal for over 5 megapixels
- Distortion free lenses of less than 0.02%. TV distortion is limited to 0.25% on the entire image area even when used with a 5 megapixel camera

Various types of lenses are used in machine vision systems. In order to achieve the highest performance, it is important to select the lens most suitable for the application.

Product Number Breakdown Ex. LM 12 JCM
① ② ③

①Represents lens function
- ●LM·····KOWA CCTV lenses
- ●LMZ·····KOWA Zoom lenses
- ●LMVZ·····KOWA Varifocal lenses

②Represents focal length (fixed focal length lenses)

③Represents format sizes and lens type
- ●XC ····· 4/3 inch format megapixel lens
- ●CLS ····· 3CCD color line scan lens
- ●SC,HC···· 1 inch format megapixel lens
- ●HC-SW ···· 1 inch format SWIR lens
- ●JC ····· 2/3 inch format lens
- ●JCM ·····2/3 inch format megapixel lens
- ●NCL ····· 1/2 inch format lens
- ●NCM ·····1/2 inch format megapixel lens
- ●M ····· Macro lens
- ●TC ····· Telecentric lens
- ●NC3 ····· 1/2 inch format 3CCD megapixel lens
- ●IR ····· IR-corrected lens
- ●NF ····· NF mount lens

■Quick selection - How to calculate focal length

Ex) A 2/3″ camera is used to capture an object 100mm wide from a distance of 300mm.
Use the picture below and the image size chart to substitute for Y, L, and Y′. Then, to capture the entire object, use the formula f=L*Y′/Y to calculate focal length.

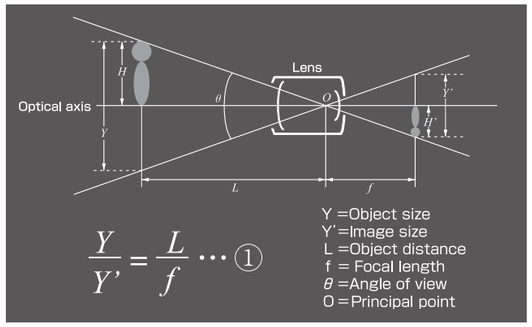
Y′=8.8mm(See image size chart), L=300mm, Y=100mm
f = 300*8.8/100
f=26.4mm.
The most appropriate lens is f=25mm lens, which is close but not greater than the 26.4 derived from the calculation.
Lenses with shorter focal lengths than the given number can capture an object in its entirety.

■Quick selection - How to calculate the angle of view

Ex) A 1/2″ camera is used to shoot an object 300mm away. The focal length of the lens is 16mm. Use the picture below and image size chart to substitute for f, L, and Y1 (H or V accordingly). Then to calculate the angle of view, use the formula Y= L*Y′/f.

Width- Y′=6.4mm (Horizontal), f=16mm, L=300mm
Y= 300*6.4/16
Y= 120mm
Vertical-Y′=4.8mm (Vertical), f=16mm, L=300mm
Y=300*4.8/16
Y=90mm
Thus in order to capture the object in its entirety, the maximum dimensions of an object at a distance of 300mm is 120mm wide and 90mm height.

〈Characteristics of lenses are described below〉

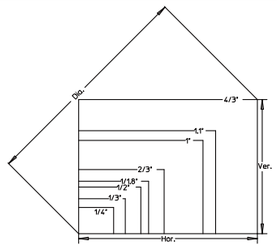


Object size····· Field range which can be captured by the image sensor
Image size ····· See description
Object distance Distance from the lens to the object
Focal length····· Distance from the pricipal point to the focus point
Angle of view····· This angle represents a shooting range in degrees. The shorter a focal length is, the bigger an angle of view is.
Principal point ··· Optical center of the lens

■Image size

Image size represents size of camera sensor

Camera	Hor.(mm)	Ver.(mm)	Dia.(mm)
1/4 inch	3.6	2.7	4.5
1/3 inch	4.8	3.6	6
1/2 inch	6.4	4.8	8
1/1.8 inch	7.2	5.4	9
2/3 inch	8.8	6.6	11
1 inch	12.8	9.6	16
1.1 inch	14.1	10.6	17.6
4/3 inch	18.4	13.8	23



■F-number

The F-number represents the amount of light that passes through a lens. As the F-number decreases, the amount of light that passes through the lens increases. The F-number affects the depth of field as mentioned below.

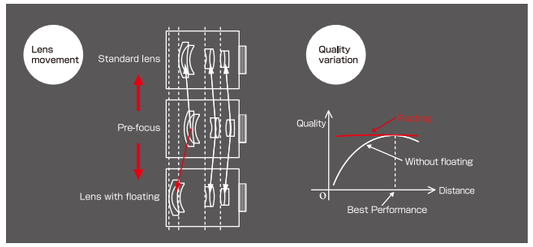
■Depth of field

Depth of field is the range of distance, in front of and behind a subject that appears in focus. If the depth of field is deep, an object will appear to be in focus even if it moves slightly back and forth.

The characteristics of depth of field (comparing lenses with the same specifications)
- ●Increasing the F-number (darker) increases the depth.
- ●Shortening the focal length increases the depth.
- ●Lengthening the object distance increases the depth.

■Floating Mechanism system

The floating mechanism system is effective in preventing malfunction and increasing the life of the lens. It is also called the close distance aberration compensation mechanism.
In standard CCTV lenses, the whole or a part of the lens moves when focusing. However, moving one lens element and not the entire lens system changes the direction of the light rays and decreases the optical performance.
However, lenses with the floating mechanism system can vary the distance between the lens elements. This enables the lens to achieve the highest performance at various objective distances.



Processing technology

Lens processing facility

Kowa has the facility to manufacture any optical device with the requested specifications.

Examples of optical devices

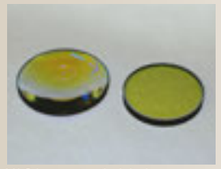
- **Parabolic mirrors**
- **Plastic molded lenses**
- **Germanium lenses**
- **Special filters**
- **Aspherical Lenses**

Coating machine

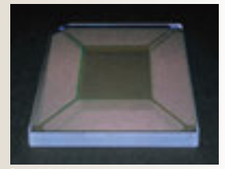
Aspherical lens processing machine

Ultra-precision processing machine

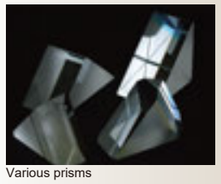
Spherical and Aspherical lenses



YAG laser cut optical devices



Special mirrors



Various prisms

Optical devices with special coatings

Ultra-precision optical devices

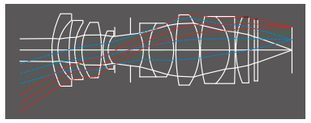
Design & Development

OEM Product Design

Kowa has the ability to create an OEM customized optical system, which includes the optical, mechanical, electrical and software design. We will provide you the best solution for every customer who requires high-end customized products.

Example of Customized Optics

- **Optics for Medical X-ray diagnostics**
- **Optics for Semiconductor instruments**
- **Optics for laser scanning applications**
- **Optics for surveillance applications**
- **Optics for printing applications**



Kowa will provide suggestions about the customized optics based on the flow chart below.
